(Updated as of October 31, 2026)

RESEARCH INTERESTS

Materials at extreme pressures and temperatures; phase equilibria and equations of state; mantle petrology and volatiles; early Earth and planetary habitability; structure and evolution of planetary interiors; exoplanet mass–radius relations; high-pressure experiments (multi-anvil press, diamond anvil cell), atomistic simulations (density functional theory, machine-learning interatomic potentials), and thermodynamic modeling; statistical learning; history of geophysics.

EDUCATION

2017–2023	**Harvard University**, Cambridge, MA Ph.D. & M.A. in Earth and Planetary Sciences Secondary field in the History of Science Dissertation: *Water and Phase Transitions in Rocky Planetary Interiors* Advisor: Rebecca A. Fischer
2014–2017	**University of Michigan**, Ann Arbor, MI B.S. in Earth and Environmental Sciences (High Honors) Minor in Environmental History

APPOINTMENTS

2026–present	Assistant Professor, Department of Geosciences, Stony Brook University
2026–present	Faculty Member, Mineral Physics Institute, Stony Brook University
2023–2026	Stanback Postdoctoral Fellow, Division of Geological and Planetary Sciences, Caltech
2023–2026	Visiting Postdoctoral Researcher, Department of Earth, Planetary, and Space Sciences, UCLA
2023 Summer	Postdoctoral Researcher, Department of Earth and Planetary Sciences, Harvard University

HONORS AND AWARDS

2023	Study of the Earth's Deep Interior Section Award for Graduate Research, AGU
2023	Mineral and Rock Physics Graduate Research Award, AGU
2023	Foster and Coco Stanback Postdoctoral Fellowship in Comparative Planetary Evolution, Caltech GPS
2021 & 2022	Distinction in Teaching, Harvard College
2017	James M. Peirce Graduate Fellowship, Harvard GSAS

TALKS

Colloquia and Seminars

2026	MINERALS Seminar, Columbia University & Lamont-Doherty Earth Observatory
2026	Excalibur Seminar, NASA Jet Propulsion Laboratory
2025	Smith Lecture, Michigan Earth
2025	DIX Planetary Science Seminar, Caltech GPS
2025	Special Seminar, ASU School of Molecular Sciences & FORCE
2025	Departmental Colloquium, Stony Brook Geosciences
2025	Special Seminar, University of Washington ESS
2025	Geochemistry Lunch Brunch, Brown DEEPS
2024	Seismo Lab Seminar, Caltech GPS
2024	Geocheminar, UCLA EPSS
2023	CMAP Seminar, University of Rochester
2023	Seismology, Tectonics and Earth's Interior Seminar, UCLA EPSS
2022	Petrology Seminar, ANU Research School of Earth Sciences, Australia
2022	Solid Earth Brown Bag Seminar, Princeton GEO
2022	COG^3 Seminar, MIT EAPS
2021	Departmental Colloquium, Harvard EPS

Conference Talks

2026	AGU Fall Meeting, San Francisco, CA (invited)
2026	ExPet26, Carnegie Institution for Science, Washington, DC
2026	AAS Topical Conference Series 11: Exoplanet Atmospheres, Denver, CO
2026	Inner Solar System Workshop, Houston, TX
2025	AGU Fall Meeting, New Orleans, LA
2025	Workshop on Macro- and Microphysics, &HPS 10, Pasadena, CA
2025	APS Topical Conference on Shock Compression of Condensed Matter, Washington, DC
2024	AGU Fall Meeting, Washington, DC (2 talks)
2024	AAS Division for Planetary Sciences Annual Meeting, Boise, ID
2024	GSA Connects, Anaheim, CA
2024	Goldschmidt Conference, Chicago, IL
2022	AGU Fall Meeting, Chicago, IL
2022	Goldschmidt Conference, Honolulu, HI
2022	COMPRES Annual Meeting, Online
2021	COMPRES Annual Meeting, Online
2019	Goldschmidt Conference, Barcelona, Spain
2018	AGU Fall Meeting, Washington, DC
2018	Goldschmidt Conference, Boston, MA
2018	COMPRES Annual Meeting, Albuquerque, NM

TEACHING AND MENTORING

Instructor

2027 Spring — GEO 122: Physical Geology, Stony Brook Geosciences

2026 Fall — GEO 604: Topics in Planetary Science (Water & Planetary Habitability), Stony Brook Geosciences

Teaching Fellow

2022 Fall — E-PSCI 120/220: Introduction to Planetary Sciences (Roger Fu), Harvard EPS

2022 Spring — E-PSCI 54: Minerals and Rocks of the Earth and Planets (Rebecca Fischer), Harvard EPS

2021 Fall — E-PSCI 10: A Brief History of the Earth (Jerry Mitrovica & Rebecca Fischer), Harvard EPS

2021 J-term — E-PSCI 101: Global Warming Science (Eli Tziperman), Harvard EPS

2019 Spring — SCIPHUNV 30: Life as a Planetary Phenomenon (Dimitar Sasselov), Harvard EPS & Astronomy

Field Trips

2025 Spring — Field trip assistant, Ge 1: Earth and Environment (3 days), Caltech GPS (active faulting at the 1872 Lone Pine scarp, Sierra Nevada granites, caldera volcanism of the Bishop Tuff and Long Valley, and Mono Lake tufa, eastern California)

2022 Fall — Field trip co-leader, E-PSCI 120/220: Introduction to Planetary Sciences (2 days), Harvard EPS (Central Atlantic Magmatic Province flood basalts, pillow lavas, and orbitally paced lake sediments of the Hartford and Deerfield Basins, Massachusetts and Connecticut)

2022 Spring — Field trip co-leader, E-PSCI 54: Minerals and Rocks of the Earth and Planets (1 day), Harvard EPS (tourmaline-bearing pegmatite at Havey Quarry, Maine)

Graduate Students

2026 — Eashan Das, Stony Brook (Ph.D. committee member)

Undergraduate Students

2026–present — Lanxun Zhao, Stony Brook (Martian mantle redox; senior research, GEO 487)

2024 Summer — Alana Nisperos and Pearl Oyewole, Caltech (ice phase diagrams for Uranus; talk and poster, FSRI Summer Symposium 2024)

2023 Summer — Larom Segev and Pierce Cousins, Harvard College (ice phase diagrams for Uranus; co-authors on Uranus Flagship 2023 workshop poster)

2021–present — Darius Mardaru, Harvard College (since high school; machine-learning inversion of phase equilibria; Herchel Smith Fellowship, Harvard College 2022; co-author, *The Planetary Science Journal* 2025; first-author posters, Gordon Research Conference 2023 and AGU Fall Meeting 2022)

2021 Summer — Robert Greene and Rafid Quayum, Harvard College (Martian mantle petrology)

High School Students

2023 Summer — Sylvie Wurmser, Montclair High School, NJ (ice phase diagrams for Uranus; co-authors on Uranus Flagship 2023 workshop poster)

2021–2022 — James Wreh, Marin Manoach, and Andre Wante, Cambridge Rindge and Latin School, MA

PROFESSIONAL SERVICE

Leadership and Committees

2023–2024 — Student & Early Career Representative, Executive Committee, AGU Science and Society Section

2018–2020 — Chair (2019–2020) and Member, Student and Postdoc Committee, COMPRES

2020 — Member, Meeting Planning Committee, COMPRES

Workshops Organized

2025 — *Workshop on the Historical and Conceptual Relationship between Macro- and Microphysics*, in conjunction with the 10th Conference for Integrated History and Philosophy of Science (&HPS 10), Caltech

Conference Sessions Convened

2026 — Delivery and Global Cycling of Volatiles in Rocky Planets, *AGU Fall Meeting*, San Francisco, CA

2025 — Science and Society: Social and Behavioral Sciences, *AGU Fall Meeting*, New Orleans, LA

2024 — Empowering Change: The Role of Student and Early-Career Scientists in Shaping the Future of Research at the Intersection of Science and Society, *AGU Fall Meeting*, Washington, DC

2024 — Science and Society: Social and Behavioral Sciences, *AGU Fall Meeting*, Washington, DC

2024	Exoplanets & Giant Planets: Atmospheric and Interior Modeling, *56th Annual Meeting of the AAS Division for Planetary Sciences*, Boise, ID
2023	Advanced Experimental, Computational, and Analytical Approaches in Exploring Deep Planetary Interiors, *AGU Fall Meeting*, San Francisco, CA
2023	Finding Your Place as an Early-Career Scientist Bridging Science and Society, *AGU Fall Meeting*, San Francisco, CA
2023	Widening the Geosciences: A Historical and Philosophical Perspective, *AGU Fall Meeting*, San Francisco, CA
2022	Properties of Volatiles and Metal Alloys in Rocky Planetary Interiors and Their Surface Expression, *AGU Fall Meeting*, Chicago, IL
2022	History of the Earth Sciences for the Future, *AGU Fall Meeting*, Chicago, IL
2022	Volatiles and Melting in the Earth's Interior, *Goldschmidt Conference*, Honolulu, HI
2021	Hydrogen and Carbon in the Solid Earth from Crust to Core, *AGU Fall Meeting*, New Orleans, LA
2020	A Multidisciplinary Approach to Understanding Volatiles in Earth's Mantle, *AGU Fall Meeting*, Online

Reviewer for Journals

American Mineralogist, *Astronomy & Astrophysics*, *Earth and Planetary Science Letters*, *Geophysical Research Letters*, *Nature*, *Nature Geoscience*, *Physics of the Earth and Planetary Interiors*, *Science Advances*

Reviewer for Funding Agencies

NASA Emerging Worlds (EW), NASA Exoplanets Research Program (XRP), NSF Frontier Research in Earth Sciences (FRES), Deutsche Forschungsgemeinschaft (DFG)

INSTITUTIONAL SERVICE

Leadership and Committees

2027 Spring	Organizer, Department Colloquium Series, Stony Brook Geosciences
2026–present	Faculty Advisor, Geology Club, Stony Brook
2025	Member, Everhart Lecture Series Committee, Caltech
2023–2024	Division Representative, Caltech Postdoctoral Association
2022–2023	Chair, Working Group for Imagery, Signage, and History of Racism, Harvard EPS
2022–2023	Member, Diversity, Inclusion and Belonging Council, Harvard EPS

Panels and Working Groups

2023	Member, Admissions and Graduate Education Working Group, Harvard GSAS

OUTREACH

Public Talks

2026	"Oceans of Lava, Skies of Rock: The Hottest Planets We Know," Geology Open Night, Stony Brook Geosciences
2025	Invited talk, Science History at Caltech (SHAC)
2022	"From Blue to Red: How Mars Got and Lost Its Oceans," Harvard GSAS & Science in the News (SITN), Boston
2021	Guest speaker, Astronomy Club, Cambridge Rindge and Latin School

Selected Media Coverage

2025	*Science* — "New Picture of Mars's Interior Emerges from Lander Data" (Paul Voosen)
2025	*Science* — "A Deep Earth Layer May Have Primed the Planet for Plate Tectonics" (Hannah Richter)
2025	*Science* — "New Complexity Emerges in Earth's 'Boring' Middle Region" (Paul Voosen)
2022	*New Scientist* — "What Earth's Mysterious Infancy Tells Us About the Origins of Life" (Michael Marshall)
2022	*Eos* — "How Much Did the Moon Heat Young Earth?" (Jure Japelj)
2021	*Science* — "Ancient Earth Was a Water World" (Paul Voosen)
2021	*Harvard Gazette* — "Earth May Have Been a Water World 3 Billion Years Ago" (Juan Siliezar)
2021	*Eos* Editors' Highlight — "Watering Down the Mantle" (Vincent Salters)
2021	AGU Press Release — "Early Earth's Hot Mantle May Have Led to Archean 'Water World' "

PROFESSIONAL MEMBERSHIPS

2025–present	American Physical Society
2024–present	American Astronomical Society (incl. Division for Planetary Sciences)
2024–present	Geological Society of America
2023–present	History of Science Society
2017–present	Geochemical Society
2017–present	Mineralogical Society of America
2016–present	American Geophysical Union
